

GLOBAL ENTERPRISE OPERATIONS & AI ENGINEERING POLICY MANUAL

Comprehensive Corporate Standards, Hackathon Governance, Streaming Live RAG Constraints & Operational Rules

Document ID	Doc_POLICY	Effective Cycle	Q3/Q4 2026
Governance Scope	Global Engineering, Travel, Events & AI Hackathons	Classification	Internal Compliance Level 3
Authority	Finance, HR Operations & AI Excellence Council	Audit Window	Quarterly Strict Reconciliation

Chapter 1: Global Corporate Travel & Airline Booking Governance

Section 1: Domestic Air Travel, Booking Windows & Economy Class Mandate

All domestic employee travel must be booked through the enterprise travel management platform at least 10 business days prior to departure. Air travel is restricted strictly to standard Economy class. Upgrades to Economy Plus or exit-row seating are non-reimbursable unless the employee is traveling on operational redeployment with equipment cargo exceeding 25 kg. Pre-approved airline baggage allowance covers exactly one checked bag up to 23 kg.

Section 2: Long-Haul International Flights, VP Approval & Business Class Thresholds

International travel mandates formal written pre-approval from the Business Unit Vice President at least 21 calendar days in advance. Continuous scheduled flight legs exceeding 8 hours qualify for Premium Economy booking; legs exceeding 11 continuous hours qualify for Business Class lie-flat seating to ensure immediate operational fitness upon landing. Post-departure ticket alterations without emergency operational waiver are fully non-reimbursable.

Section 3: Flight Delays, Disruption Compensation & Airline Refund Procedures

In the event of flight cancellations or carrier delays exceeding 4 hours, employees must seek direct carrier rebooking before booking alternate commercial flights. Airline compensation vouchers, refund checks, or hotel credits issued by carriers remain the legal property of the enterprise and must be declared in the ERP expense submission within 14 calendar days of trip conclusion.

Chapter 2: Hotel Lodging Limits, Regional City Tiers & Extended Stay Allowances

Section 4: Tier-1 Global Metros Lodging Caps & Incidentals Restrictions

Nightly hotel room tariffs in Tier-1 Mega-Metros (New York City, San Francisco, London, Tokyo, Singapore, Zurich) are capped at a maximum of 20 USD per night inclusive of all local occupancy taxes and continental breakfast. In-room minibar consumption, pay-per-view entertainment, spa facilities, and laundry service for stays under 4 nights are explicitly designated non-reimbursable personal expenses.

Section 5: Tier-2 Innovation Hubs Lodging Allowances & Secondary Cities

Nightly lodging tariffs in Tier-2 Innovation Hubs (Austin, Berlin, Bangalore, Toronto, Pune, Seattle, Dublin) are capped at a maximum of 10 USD per night inclusive of breakfast. When authorized hotels within corporate safety directories exceed these caps by over 15% due to peak citywide conventions, an automated Travel Director exception must be triggered prior to confirmation.

Section 6: Extended Project Stays Exceeding 14 Nights & Serviced Apartments

For temporary project assignments, client on-sites, or hackathon residencies extending beyond 14 continuous nights in any single metropolitan area, employees must transition from commercial hotels to approved corporate serviced apartments. Extended stay monthly housing budgets are capped at ,500 USD in Tier-1 cities and ,800 USD in Tier-2 cities, generating substantial operational savings.

Chapter 3: Event Spaces, Corporate Workshops & Venue Capacity Thresholds

Section 7: Pune Region Approved Workshop Venues & Standard Capacities

For corporate training workshops and technical symposia held in the Pune metropolitan region, approved enterprise facilities include Venue A (Kalyani Nagar) with a maximum documented seating capacity of 30 attendees, and Venue B (Shivajinagar) with 25 attendees. Both certified venues feature interactive 4K dual-projector arrays, breakout pods, and dedicated gigabit fiber links.

Section 8: Capacity Overflow Governance, Surcharges & Large Venue Reallocation

Workshops or customer roundtables expecting between 31 and 100 participants cannot be accommodated at Kalyani Nagar Venue A or Shivajinagar Venue B; they must be booked into Grand Ballroom B at the Pune Tech Center. Bookings exceeding 30 participants require an additional 50 USD facility surcharge covering auxiliary air conditioning, event staff, and audio engineering support.

Section 9: Venue Reservation Cancellation Schedules & Refund Percentage Rules

Corporate venue reservations canceled at least 14 full calendar days prior to the event start date qualify for a 100% full refund of all deposits. Cancellations submitted between 7 and 13 calendar days prior to start date receive a 50% refund. Cancellations made fewer than 7 days prior to event kick-off forfeit 100% of all booking deposits and catering retainer fees without exception.

Chapter 4: Food Services, Catering Operations & Dietary Compliance

Section 10: On-Site Buffet Catering Services & Minimum Headcount Thresholds

On-site event catering for workshops and team offsites is provisioned directly through contracted institutional food service partners. Standard hot buffet service requires a minimum headcount of 15 attendees. Continental breakfast and mid-afternoon espresso service are capped at 2 USD per attendee per day across all domestic facilities.

Section 11: Dietary Accommodations, Allergen Isolation & 72-Hour Lead Time

Specialized dietary accommodations—including certified Vegan, Halal, Kosher, and severe Celiac/Gluten-Free allergen isolation—require submission of exact headcount counts to the catering coordinator at least 72 hours prior to event commencement. Emergency on-site dietary requests submitted with less than 24 hours notice incur a 5 USD rush fee per specialized meal.

Section 12: External Food Vendor Prohibition, Health Safety & Waiver Protocols

Due to health insurance liability, corporate compliance, and hygiene auditing standards, unvetted third-party delivery services (e.g. UberEats, DoorDash, Zomato) cannot provide bulk catering for official events on corporate property. External food services exceeding 00 USD require prior submission of the vendor health inspection certificate and Facilities authorization.

Chapter 5: AI Hackathons, Nebius GPU Cloud Grants & IP Open-Source Licensing

Section 13: Accredited External AI Hackathon Competitions & Team Eligibility

Engineering teams are encouraged to participate in premier external AI challenges and hackathons, explicitly including Samsung PRISM Theme 4 (Streaming Live RAG), the Nebius Token Factory NVIDIA Nemotron Hackathon, and NeurIPS Developer Competitions. To qualify for corporate sponsorship, teams must contain between 2 and 5 full-time engineers and register with the Engineering Excellence Council 7 days prior to start.

Section 14: Cloud GPU Compute Prototyping Stipends & Token Factory API Budgets

Approved hackathon teams receive a dedicated prototyping grant of up to ,500 USD per team. This grant is earmarked exclusively for high-throughput cloud GPU resources (e.g. Nebius AI Cloud H100/H200 SXM clusters, Token Factory Nemotron 70B/120B inference endpoints, and Groq high-speed LPU instances). Expenditure claims require API usage invoices and key telemetry logs showing prompt/completion token accounting.

Section 15: Intellectual Property Governance & Open-Source Apache 2.0 Licensing

All algorithmic source code, agent architectures, and hybrid retrieval indexes developed during accredited hackathons are released as open-source software under the Apache 2.0 license by default, fostering broad technological collaboration. Teams must ensure that no proprietary enterprise customer data or non-anonymized production datasets are incorporated into public hackathon repositories.

Chapter 6: Remote Engineering Hardware, 4K Display Grants & Asset Lifecycle

Section 16: Remote Setup Grant, Ergonomic Seating & Dual 4K Monitor Allocation

Full-time remote and designated hybrid software engineers receive a one-time home office establishment stipend of ,800 USD upon onboarding. This allocation covers certified ergonomic task seating, motorized standing desk converters, noise-canceling headsets, and up to two 27-inch or 32-inch 4K UHD external displays (or one 49-inch ultrawide display) to facilitate complex multi-window code reviews.

Section 17: Annual Peripheral Refresh Stipend & High-Performance Laptop Cadence

Beginning after the completion of 12 months continuous service, engineers receive an annual peripheral refresh budget of 50 USD for mechanical keyboards, precision mice, webcams, and USB-C docks. Standard engineering workstations (e.g. Apple Silicon M-Series Max or Dell Precision workstations with NVIDIA RTX Ada graphics) operate on a mandatory 36-month hardware upgrade refresh cycle.

Section 18: Corporate Hardware Asset Governance, Encryption & Mandatory Audits

All computing devices, development boards, and displays procured through corporate expense allocations remain exclusive legal property of the company. Equipment must be enrolled in corporate MDM (Mobile Device Management) with FileVault/BitLocker 256-bit AES encryption active at all times. Lost or stolen hardware must be reported to the IT Security Hotline within 2 hours of discovery.

Chapter 7: Expense Reconciliation, Forfeiture Timelines & Audit Compliance

Section 19: 30-Day Mandatory Expense Claim Submission Window & Receipts Protocol

All employee expense claims for travel, meals, lodging, software licenses, and hackathon materials must be submitted through the ERP financial system within 30 calendar days of expense incurrence or travel completion. Submissions must feature itemized tax invoices (GST/VAT where applicable); credit card summary slips without itemization are rejected by financial auditors.

Section 20: 60-Day Forfeiture Rule, Executive Sign-Off Exceptions & Audit Penalties

Expense submissions filed between 31 and 60 calendar days post-incurrence require written justification and Department Head exception sign-off. Any reimbursement claim submitted after 60 calendar days is permanently forfeited and non-payable under standard accounting standards. Attempted submission of falsified, inflated, or duplicated claims results in immediate termination and legal audit.
